

Show TNT Process IDs in Window Titles

DID YOU KNOW . . . you can show TNT Process IDs in window titles?

What Showing TNT Process IDs in Window Titles Gives You

- Find matching TNT process IDs in the Windows task manager
- Identify a specific TNT process to end
- Maintain all other processes running when ending the desired process
- Match View windows with associated manager or process window

Toggle on this button to show process IDs in window titles.

Select to open General System Preferences window.

Process ID numbers are same for different windows of the same process. This feature allows you to know which windows go together when running multiple instances of a process.

Process Identifier (PID) Column

Each window title shows a unique process ID that is listed in the PID column of Processes tab in the Windows Task Manager when running.

How to Show TNT Process ID in Window Titles

- Select Tools/System/Preferences from the TNT menu.
- In the General System Preferences window (the Interface tabbed panel), toggle on the Show process ID in window titles button.
- Process ID shows in window titles for processes launched after change.
